

FreshFetch

more time together...

Fresh Fetch is dedicated to providing your dog with the best quality nutrition and would like to introduce Coastal Canine Blend, a whole foods supplement consisting of a specific selection of premium quality, local coastal land and sea ingredients. Our product is hand prepared, perfectly balanced and ready to add to meals and boost the nutritional value of any diet whether it be fresh cooked, kibble, freeze dried/dehydrated, canned or raw. Our blend provides essential nutrients which support the canine immune system and contribute to optimal health. We are proud to source all our ingredients as local and regionally as possible as well as organically when possible and take great pride in our zero-waste commitment to sustainability.

Each ingredient in Coastal Canine Blend’s recipe has been carefully selected to provide optimum canine health. From the anti-inflammatory agents that turmeric and ginger provide to the antioxidant filled nutrient dense leafy greens, to the digestive and joint support from bison bone broth. The vegetables are blended to a fine consistency, breaking down plant walls for optimal absorption, and then frozen to keep nutrients and enzymes intact.

What is in Coastal Canine Blend?

Super Food	How it benefits your dog’s health
Zucchini	Supports healthy circulation, healthy heart and improves eye health
Green Bean	Provides protein to maintain healthy bones, hair, organs and muscles and is full of nutrients and minerals
Kale	A strong source of vitamins C and K
Celery	Reduces inflammation, supports digestion and is a great source of antioxidants
Wheatgrass	An excellent antioxidant. Wheatgrass supports organ cleansing, breath freshening, digestion support, help with constipation and odor control. It is naturally energy boosting and has antiseptic properties
Parsley	Vitamin K helps maintain a healthy blood clotting system and promotes liver health. Parsley is also rich in folic acids and antioxidants. It has anti-inflammatory properties that help promote good kidney health and antimicrobial properties that promote good urinary health. Parsley also helps with bad breath!
Pumpkin	An excellent source of fiber. Boosts immune health, aids in weight loss and encourages digestive regularity
Raw Egg	Egg is highly digestible with a full range of essential amino acids – the building blocks of protein - Vitamins, and minerals including Vitamin A, Riboflavin (Vitamin B), Folate, Vitamin B12, Iron, Selenium and Fatty Acids
Turmeric	Amazing anti-inflammatory properties, helps with joint pain associated with arthritis, improves cardiovascular health, and keeps bowels and intestine healthy

Ginger	Aids in the relief or prevention of gastric dilatation and volvulus (GDV or bloat) in dogs. Despite it's efficacy in preventing vomiting, ginger has been shown to stimulate stomach motility and accelerate stomach emptying time in multiple studies. Helps with Nausea, bloat, heartworm
Lemon (flesh)	In small quantities lemon eases digestion, provides vitamin C, counters bad breath and in a natural and effective flea repellent
Bison Bone Broth	Helps to strengthen the lining of the entire digestive system, fight food sensitivities, promotes the growth of probiotics in the gut, and controls inflammation. In addition to balancing the health of the gut, the collagen in bison bone broth also encourages healthy skin, coat and nails
New Zealand Green Lipped Muscle	This miracle powder contains eicosatetraenoic acids that reduce inflammation, and both GAGs, a source of chondroitin and glucosamine that support the repair of your pet's cartilage. Green Mussels are a superfood functional ingredient that helps to support healthy joints. NZGLM prevents damage by strengthening cartilage and joints, aids in the recovery of damaged areas and continues to strengthen preventing further damage in post-operative circumstances
Apple Cider Vinegar	ACV prevents urinary tract infections (UTIs), improved digestion by balancing pH levels and supports healthy skin and coat
Wild Alaskan Salmon Oil	Salmon oil is a great way to augment your dog's diet. Salmon oil is rich in omega-3 and omega-6 fatty acids that support a healthy immune system, heart health, anti-inflammatory properties, healthy skin and coat and cognitive function
Sea Kelp	Sea kelp contains over 60 vital minerals, amino acids, and vitamins. It improves digestion and promotes healthy skin and a shiny coat. Sea kelp builds immune system function to increase resistance to disease and faster healing and it provides nutrients to help dogs with hypothyroidism
